North American Jobs

SCADA Engineer

SCADA Solutions is currently looking for talented, highly motivated, and dependable software engineers (junior and experienced) to join our team in the San Diego area. This is your chance to work with some of the brightest SCADA engineers in the land.

Responsibilities

You will be directly involved in developing the next generation of our flagship WindCapture™ product. Work will encompass all aspects of the software design and development processes in an informal but over-achieving environment.

Primary Requirements

- › Science or Technical Degree from accredited university, e.g. BS in Electrical Engineering (BSEE)
- › 3+ years relevant experience
- › Experience with Allen Bradley PLC and FactoryTalk/RSView
- › Strong communications skills (written and verbal), including ability to write detailed technical reports
- › SQL and MS Access database application experience
- › Experience with electronic converters and drivers

Compensation / Benefits

SSI offers competitive compensation packages for the right candidates and is an equal opportunity employer.

Email resume and cover letter to: info@scadasolutions.com (subject: SCADA Engineer)

SCADA Programmer

SCADA Solutions is currently looking for talented, highly motivated, and dependable field technicians (junior and experienced) to join our team in the San Diego area. This is your chance to work in one of the fastest-growing industries: renewable energy.

Responsibilities

You will be directly involved in our cutting-edge SCADA system architecture and configuration. Work encompasses testing, simulating, installing, and servicing our communications and SCADA software solution networks. You will be traveling to wind farm projects around the country about 30% of the time. Your involvement will include project management, server configuration, troubleshooting, and technical support.

Primary Requirements

- › Science or Technical Degree from accredited university, e.g. BS in Electrical Engineering (BSEE)
- › 3+ years relevant experience
- › Experience with Allen Bradley PLC and FactoryTalk/RSView
- › Strong communications skills (written and verbal), including ability to write detailed technical reports
- › RF Communications experience
- › Experience with electronic converters and drivers
- › Experience with fiber optics and cable assemblies
- › Experience deploying software systems

Compensation / Benefits

SSI offers competitive compensation packages for the right candidates and is an equal opportunity employer.
